

PRACTICAL-06

Client and Server Outputs:

The image shows two terminal windows side-by-side. The left window shows the client's execution of 'client.c', and the right window shows the server's execution of 'practical6.c'. Both show similar warning messages about Peas repository and Typelib files, followed by the execution of the respective programs and the exchange of the message 'hello ubuntu'.

```
akshitha_bushetty@LAPTOP-0FF1SH0T:~$ cd OSLab
akshitha_bushetty@LAPTOP-0FF1SH0T:~/OSLab$ gedit client.c

Signals:

The image shows a terminal window where a signal handler program 'signals.c' is compiled and executed. The program prints 'Waiting for signals...', 'Program is running...', and 'Program is running...' multiple times. It then receives a signal (Ctrl-Z) and prints '[1]+ Stopped ./signals'.

```
akshitha_bushetty@LAPTOP-0FF1SH0T:~/OSLab$ cd
akshitha_bushetty@LAPTOP-0FF1SH0T:~$ cd OSLab
